EXPLANATORY NOTES.

The condensed statistics contained in this volume, unless otherwise stated in connection with the individual tables, represent, or are based upon, official figures collated and published under the various laws of the United States or those of other countries to which they may relate. The sources to which the various tables are credited will indicate where application should be made for additional details, with the exception that certain tables for which no credit appears are derived from regular reports of the Bureau of Foreign and Domestic Commerce, Department of Commerce, and that Table No. 447 is derived largely from corresponding data presented for shorter periods in previous tables.

General imports.—Tables Nos. 291 and 292 embrace imported articles entered at the customhouses for immediate consumption and imported articles entered for warehouse. The statements of *imports entered for consumption*, Tables Nos. 298, 299, and 300, embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of *general imports* and the statement of *imports entered for consumption* for any period should therefore differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

Import value.—All invoices of imported merchandise shall be made out in the currency of the place or country whence the importations shall be made, or, if purchased, or agreed to be purchased, in the currency actually paid, agreed upon, or to be paid therefor, shall contain a correct, complete, and detailed description of such merchandise and of the packages, wrappings, or other coverings containing it, and shall be made in triplicate or in quadruplicate in case of merchandise intended for immediate transportation without appraisement, and signed by the person owning or shipping the same, if the merchandise has been actually purchased, or price agreed upon, fixed, or determined, or by the manufacturer or owner thereof, if the same has been procured otherwise than by purchase, or agreement of purchase, or by the duly authorized agent of such purchaser, seller, manufacturer, or owner.

All such invoices shall, at or before the shipment of the merchandise, be produced to the consular officer of the United States of the consular district in which the merchandise was manufactured, or purchased, or contracted to be delivered from, or when purchases or agreements for purchase are made in several places, in the consular district where the merchandise is assembled for shipment, as the case may be, for export to the United States, and shall have indorsed thereon, when so produced, a declaration signed by the purchaser, seller, manufacturer, owner, or agent, setting forth that the invoice is in all respects correct and true and was made at the place from which the merchandise is to be exported to the United States; that it contains, if the merchandise was obtained by purchase, or agreement for purchase, a true and full statement of the time when, the place where, the person from whom the same was purchased, or agreed to be purchased, and the actual cost thereof, or price agreed upon, fixed, or determined, and of all charges thereon, as provided by the act of October 3, 1913; and that no discounts, rebates, or commissions are contained in the invoice but such as have been actually allowed thereon, and that all drawbacks or bounties received or to be received are shown therein; and when obtained in any other manner than by purchase, or agreement of purchase, the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value is the price at which the merchandise described in the invoice is freely offered for sale to all purchasers in said markets, and that it is the price which the manufacturer or owner making the declaration would have received, and was willing to receive, for such merchandise sold in the ordinary course of trade in the usual wholesale quantities, and that it includes all charges thereon as provided by the act of October 3, 1913, and the actual quantity thereof; and that no different invoice of the merchandise mentioned in the invoice so produced has been or will be furnished to anyone. If the merchandise was actually purchased, or agreed to be purchased, the declaration shall also contain a statement that the currency in which such invoice is made out is that which was actually paid for the merchandise by the purchaser or agreed to be paid, fixed, or determined.

Whenever imported merchandise is subject to an ad valorem rate of duty, or to a duty based upon or regulated in any manner by the value thereof, the duty shall be assessed upon the actual market value

or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country whence exported; such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the seller, shipper, or owner would have received, and was willing to receive, or such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, and if there be used for covering or holding imported merchandise, whether dutiable or free, any unusual article or form designed for use otherwise than in the bona fide transportation of such merchandise to the United States, additional duty shall be levied and collected upon such material or article at the rate to which the same would be subjected if separately imported. The words "value," or "actual market value," or "wholesale price," whenever used in the act of October 3, 1913, or in any law relating to the appraisement of imported merchandise, shall be construed to be the actual market value or wholesale price of such or similar merchandise comparable in value therewith, as defined in that act. [Rev. Stats., 336, secs. 18 and 11 of the act of June 10, 1890, or other laws or regulations, as amended by act of Oct. 3, 1913. For full details regarding methods provided for ascertaining the actual "import" or "market" value in question (requirements and duties of sellers, purchasers, manufacturers, owners, agents, importers, shippers, consignors, consignees, consuls, collectors, appraisers, other persons, and production and consumption, fines, penalties, exactions, forfeitures, modifications, effect of decisions of courts of competent jurisdiction, etc.) see the complete act of 1913.]

Domestic exports.—Tables Nos. 293 and 294 exhibit the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported, or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles and utensils made from imported metals, etc. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported. (Rev. Stat., 337, and act of Apr. 29, 1902.)

Foreign exports.—Table No. 295, called "foreign exports" or "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported from "warehouse" is their import value. The value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Weights and measures.—The term "ton," as applied to weight, is specified "long" (2,240 pounds) or "short" (2,000 pounds). The term "ton," as applied to vessel measurement, is specified as "net," equal to 100 cubic feet of carrying capacity exclusive of deductions for space occupied by cabins, machinery, etc., or "gross," equal to 100 cubic feet of the entire carrying capacity inclusive of such space. "Dead-weight tonnage" is also applied to vessel measurement, and is intended to be a measure of cargo-carrying capacity. It is the difference between the displacement of the vessel when loaded and when light, in steaming condition, but without crew, stores, water, or fuel on board. The term "M feet" used in connection with the measure of lumber, etc., signifies 1,000 feet board measure, a "foot" of such measure being 1 foot long, 1 foot wide, and 1 inch or less in thickness. "Cubic feet" or "cords," as applied to the measurement of lumber, pulp wood, etc., signifies cubic contents. According to section 3249, Revised Statutes, "Proof spirits shall be held to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of 0.7939 at 60° Fahrenheit." The official gallon prescribed is one containing 231 cubic inches, or 58,372.2 grains, equal to 8.3389 pounds of distilled water at its maximum density, weighed in air of a temperature of 62° Fahrenheit and barometric pressure of 30 inches. The taxable gallon differs from the proof gallon by reason of the fact that in computing taxable gallons under section 3251, Revised Statutes, all fractional parts of a gallon less than one-tenth are excluded.

[1] Data are for calendar year (irrigation season), except on Salt River project, where data are for corresponding "agricultural year," October, 1918, to November, 1919.

[2] Areas Reclamation Service was prepared to supply water.

[3] Irrigated crops. Excludes small areas in few projects cropped by dry farming.

[4] Includes so-called "dry lands" given right to rent water temporarily on account of ample storage.

[5] Includes 3,100 acres within town sites, about 8,500 acres reported "vacant land," in some of which are roadways, ditches, etc., and over 5,000 acres of "home tracts," including houses, lots, corrals, etc.

[6] All areas shown are those on which detailed crop census was taken.

[7] Data furnished mainly by King Hill irrigation district. System was built under private auspices. The United States has undertaken its reconstruction; operation and maintenance are handled by the district.

[8] Crop reports covered an additional area of 7,287 acres cropped by dry farming, producing crops worth $39,150, or $5.37 per acre.

[9] Figures are for 196 irrigated farms, which included small tracts farmed without irrigation. In addition, two units farmed "dry" reported 3 acres of hay valued at $75 and 20 acres of pasture valued at $120. Irrigated area includes 10 acres in United States reserve, town sites, etc.

[10] Limited by water available. The figure is approximate area under ditch.

[11] For crops in full production, excluding 10,247 acres of wild-grass pasture and 4,205 acres otherwise not in full production. For all crops, $42.50.

* *General note for irrigation tables.*—Source: The United States Reclamation Service, Department of the Interior. The figures given in these tables relate only to lands served in whole or in part by works controlled by this Service. In 1919 the area so served amounted to 2,103,568 acres (1,187,255 acres in the Reclamation Service projects proper, and 916,313 acres served by Reclamation Service works, usually a partial water supply through private canals under Warren Act contracts). Data are for calendar year (irrigation season) except on the Salt River project, Ariz., data are for corresponding "agricultural year," October, 1918, to November, 1919. Unless otherwise indicated, figures are restricted to irrigated areas covered by crop reports, excluding small areas cropped by dry farming on a few projects, the area served under Warren Act contracts, and the three Indian projects in Montana, the works for which were constructed by the Reclamation Service. All value figures are intended to show the value received by the farmer for his crops, whether sold on the farm or in town, with or without bailing, boxing, etc. If fed by the farmer, the crop is given a value representing the average selling price on the farm.

No. 28.—DENSITY OF POPULATION PER SQUARE MILE AT EACH CENSUS, 1790 TO 1920: By States.

[Source: Reports of the Bureau of the Census, Department of Commerce.]

[Note.—In computing density of population for the United States, the areas and population of Alaska, Hawaii, and Porto Rico in 1900 and 1910, of Alaska and Hawaii in 1890, and of Indian Territory in 1860, 1870, and 1880 are not considered. The area of Indian reservations, outside of Indian Territory, is included in the area of the States and Territories in which they are severally situated, and in that of the United States, although the population of these Indian reservations was not ascertained, and for this reason can not be considered in figuring density of population at the censuses prior to 1890.]

Note.—The populations used in computing the rates and percentages for 1911 to 1919 are estimated by the arithmetical method, based on the Federal censuses of 1910 and 1920. All death rates are based on the total deaths, which include those of soldiers, sailors, and marines.

[1] Exclusive of Hawaii.
[2] Exclusive of stillbirths.
[3] Census year ending May 31.
[4] Increase of 194 square miles, as compared with the area stated by census of 1890, due to the reclamation of part of the Potomac River Flats in the District of Columbia and of part of Lake Tulare in California.
[5] Net reduction of 269 square miles, as compared with the area stated by census of 1900, due to the drainage of lakes and swamps in Illinois and Indiana, to the building of the Roosevelt and Laguna Reservoirs, and to the overflow of the Colorado River into the Salton Sea in California.
[6] The figures for 1918 include 3,474 "additional deaths" given in the 1918 Report.

No. 52.—DEATHS:[1] Number and Distribution per 1,000, from all Causes, Calendar Years 1900 and 1910 to 1919, in the Registration Area,[2] by Color, Nativity, and Parent Nativity.

NOTE.—"Tuberculosis of the lungs," "other forms of tuberculosis," and "violent deaths (suicide excepted)" for 1900 have been classified according to the second revision of Causes of Death in 1910, in order that the numbers and rates for these causes may be comparable with those for the other years shown. The populations used in computing the rates for 1911 to 1919 are estimated by the arithmetical method, based on the Federal censuses of 1910 and 1920. All death rates are based on the total deaths, which include those of soldiers, sailors, and marines.

[1] Population of incorporated places having 2,500 or more inhabitants in 1910. The figure for 1900 does not represent the urban population according to that census, but denotes the population in that year of the territory classified as urban in 1910.

[2] Total, exclusive of urban. (See note 1.)

[3] While the drainage of lakes and swamps in Illinois and Indiana caused some increase in total area between 1900 and 1910, the building of the Roosevelt and Laguna Reservoirs and the formation of the Salton Sea in California resulted in a net decrease of total acreage as indicated.

[4] Decrease.

[2] Acreage reports for miscellaneous seeds were consolidated with those for minor field crops in 1900.

[3] Several crops or farm products for which the Census Bureau has no separate acreage reports yielded considerable returns. The acreage of cotton seed, if separately reported, would be a duplication of the acreage of cotton; that of grass seed, of hay and forage crops; and that of vegetable and flower seeds, of vegetables and of flowers and plants. Such products as flax fiber, flax straw, other straw, and cornstalks and leaves come from the acreage reported under cereals. No acreage could be given for the maple sugar and sirup or forest products. The number of trees of bearing age and the number not of bearing age were thought to be more satisfactory as a measure of the extent of the fruit and nut industry than acreage, and, therefore, acreage reports are not shown except for small fruits.

No. 139.—SUMMARY OF MANUFACTURES: BY SPECIFIED INDUSTRIES, CALENDAR YEARS 1909 AND 1914.

[Source: Reports of the Bureau of the Census, Department of Commerce. The figures for some industries do not represent the total production, because certain important establishments which incidentally manufacture the same class of products are engaged primarily in othor lines of manufacture and the statistics for them are accordingly included with those of other industries. Primary horsepower includes power generated in manufacturing establishments plus electric and other power rented from outside sources; it does not include the power of electric motors run by current generated in the same establishment.]

[1] The act of Congress approved Apr. 30, 1912, authorized the Bureau of the Census to collect statistics of leaf tobacco held on Apr. 1 and Oct. 1 of each year. It provided that a report should be secured from each manufacturer of tobacco who, according to the returns of the Commissioner of Internal Revenue, manufactured during the preceding calendar year more than 50,000 pounds of tobacco; from each manufacturer of cigars who manufactured more than 250,000 cigars; from each manufacturer of cigarettes who manufactured more than 1,000,000 cigarettes; and from each dealer in leaf tobacco who, on an average, had more than 50,000 pounds of leaf tobacco in stock at the ends of the four quarters of the preceding calendar year. The first report made under the provisions of this law was of leaf tobacco held on Oct. 1, 1912, and statistics have been collected regularly since that date.

[1] Many of the figures for 1919 and 1920 are preliminary and some of them are estimated. Totals for this column represent the sum of the values here shown with the addition of certain estimates for values not yet available. See following notes.

[2] Values not included in total values.

[3] "Long" tons, 2,240 avoirdupois pounds; "short" tons, 2,000 pounds.

[4] Ferroalloys include ferromanganese, spiegeleisen, ferrosilicon, ferrophosphorus, ferrocarbontitanium, ferrocerium, ferrochrome, ferromolybdenum, ferrotitanium, ferrotungsten, ferrouranium, ferrovanadium, and ferrozirconium.

[5] Figures not available. Estimate of value included in total value of metallic products.

[6] Average price per troy ounce in 1916, 65.8 cents; in 1917, 82.4 cents; in 1918, 98 cents; in 1919, $1.12; in 1920, $1.02.

[7] Coining value, $20.671834625323 per ounce.

[8] The product from domestic ores only.

[9] After 1916, sales value.

[10] Of 75 avoirdupois pounds net.

[11] From all sources. Values excluded from metallic totals as the values of the antimony contained in antimonial lead are included in the antimonial lead values and the remainder under "Unspecified."

[12] Figures not available. Estimate of value, other than that entering into antimonial lead, included under "Unspecified."

[13] From both domestic and foreign ores.

[14] Manganese ore containing 35 per cent or more of manganese, manganiferous ore containing 5 to 35 per cent of manganese.

[15] By-product in electrolytic copper refining, 1916–1918; also from Missouri mixed ores in 1919 and 1920.

[16] Including brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania. The value of bituminous coal in 1919 and 1920 is an estimate based on average value (representing about 25 per cent of the total production of bituminous coal for 9 months) reported by the National Coal Association to the Committee on Manufactures of the United States Senate which considered the Calder Bill.

[17] Figures not available. Estimate of value included in total value of nonmetallic products.

[18] Of 42 gallons.

[19] Of 376 pounds net.

[20] Figures not available.

[21] Exclusive of value of slate granules included under "Unspecified."

[22] Of 280 pounds net.

[23] In addition to the arsenious oxide (white arsenic), metallic arsenic was produced in 1918 and 1919. The value of this is included under "Unspecified."

[1] The census figures for the Bell System do not agree exactly with those contained in the annual reports of the directors of the company as given on the preceding page, because the former include certain affiliated and controlled companies that were not covered in the annual reports. The Bell System companies are located in 27 different States, and its local and long-distance service extends into all States. The miles of wire and number of telephones are the only features for which satisfactory comparison can be made between the Bell and other systems.

[2] Number for 1917 is that employed on Sept. 29, for 1912 on Sept. 16.

[Sources: Years 1897 to 1910, statistical reports of the Interstate Commerce Commission; for subsequent years, accident bulletins of that commission compiled from monthly reports required under the act approved May 6, 1910. For various reasons, mainly the fact that returns were required under different acts, the statistics are not strictly comparable. Figures include nontrain (or industrial) accidents.]

[1] During the first six months of the year 1914 rates paid on grain, flour, and provisions were quite low as compared with previous years; the European war, however, shortly after the beginning of hostilities, created a tremendous demand for tonnage and forced rates to the highest level known to this generation of shippers. Complete statements of freight averages for 1914 to 1916 are therefore impossible, and for 1917, 1918, and 1919 no figures are available.

[1] The figures of this table do not in most instances agree with those under corresponding heads in the table following, owing to the fact that the schedules of the tariff and the classifications of the Bureau of Foreign and Domestic Commeree do not fully coincide as to the articles included. See note 3, p. 536.

[2] Potatoes, dutiable under paragraph 581, and wheat and produets, dutiable under paragraph 644, tariff act of 1913, are included beginning with 1914.

[1] See also prior table of "Merchandise imported into and exported from the United States and excess of imports or exports, by countries."

[2] The marked discrepancy between the United States figures of exports to the Philippine Islands prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

[4] Figures relate to continental United States after 1900.

[5] Expressed mainly in terms of raw sugar.

[6] Figures of production and those based thereon are somewhat preliminary and are subject to correction.

[7] The Sugar Equalization Board states that large quantities of sugar were bought by the British Government in Cuba in 1918 and brought to the United States for refining. Such amounts, of course, would augment both imports and exports and practically counterbalance. Similar conditions extended to later years.

[8] Figures include beets and sugar from 840 acres in Ontario, Canada.

[1] The production statistics relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1870 to 1898. Census figures have, however, been used when available, including those for 1899 to date.

[2] For 1910 to date the price per pound shown for upland cotton represents the average price received for cotton by growers as computed by the Department of Agriculture; for 1902–1909 it is the average price of the average grade marketed in New Orleans prior to April 1 of the following year; for 1890–1991, inclusive, it is the average price of middling cotton on the New Orleans Cotton Exchange; and for 1870–1889, inclusive, it is taken from reports of the United States Department of Agriculture.

[3] Statistics of consumption for 1863–1894, inclusive, have been compiled from publications of the United States Department of Agriculture, and those for 1895–1903, inclusive, from the reports of Latham, Alexander & Co. Census figures are used for 1904 to date as well as for other years when available. The statistics relate to the 12 months during which the crop of the specified year was chiefly marketed, and not to the calendar year specified.

[4] For 1870 to 1913, inclusive, statistics relate to the 12 months beginning with September 1; and for 1914 to date to the 12 months beginning with August 1.

[5] Statistics for August, 1914, are included in both 1914 and 1915.

No. 323.—DISTILLED SPIRITS, WINES, AND MALT LIQUORS: Quantities Consumed and Average Annual Consumption per Capita in the United States, 1850 to 1920.[1]

[Source: The production of domestic wines prior to 1918 has been estimated by the Department of Agriculture, by Mr. J. W. Schopp, of Bonfort's Wine and Spirit Circular (Inc.), New York, and other well-informed persons, and figures relate to the calendar year. The production of domestic spirituous and malt liquors has been derived from the reports of the Commissioner of Internal Revenue; as has also that of wine after 1917, the figures relating to the fiscal year. The table does not include for any year withdrawals of distilled spirits for scientific purposes and for use of the United States, nor since 1906 withdrawals for denaturation, free of tax. For 1920 these amounts were 878,003 tax gallons and 45,640,949 proof gallons, respectively.]

NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits in a concise form the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleece wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

[2] Commodity rates were established during Sept. and Oct., 1915, and merged with those for commercial paper of corresponding maturities in Nov. and Dec., 1917.
[3] Maximum rate during 1919 for maturities 16 to 60 days, 4¾ per cent.
[4] Commodity paper rates for bills maturing within 30 days, 3½ per cent; 31 to 60 days, 4 per cent; 61 to 90 days, 4½ per cent.
[5] Oct. 20, 1917, rate of 3½ per cent for commodity paper maturing within 60 days, and 4 per cent for paper maturing after 60 days but within 90 days.

NOTE.—Rates on paper secured by War Finance Corporation bonds, established by all Federal Reserve banks between Apr. 4 and 11, 1919, at 1 per cent higher than on commercial paper of corresponding maturities were automatically discontinued, effective Apr. 1, 1920, coincident with the maturity of all outstanding War Finance Corporation bonds.

[9] Consisting of the balance in the general fund, the gold reserve and coin and bullion set apart for redemption of certificates and Treasury notes. Up to and including 1915 disbursing officers' credits subject to check were shown as a liability against cash in the Treasury, thereby reducing the balance in the general fund; since that year such credits have not been so carried because they are merely book credits or authorizations to draw on the Treasurer.

[10] All figures relate to continental United States.

[11] Without deducting matured interest obligations, etc., but including disbursing officers' credits on June 30.

[1] Based on warrants issued during the year.

[2] The cost of collecting the internal revenue embraces the following items: Salaries and expenses of the Internal-Revenue Service, including collectors, deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, expenses of detecting and punishing violations of internal-revenue laws, and expenses of collecting the corporation tax.

[3] The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the disbursements for salaries, etc., incident to auditing these accounts in the office of the Auditor for the Treasury Department.

[1] The large increase in field-service figures for 1913 is due to the inclusion of navy-yard artisans' positions to the number of about 16,000 in the competitive classified service.

[2] 11,635 fourth-class postmasters, appointed in 1914 and 18,238 in 1915, under the Executive order of May 7, 1913, requiring examinations at offices whose incumbents had not been appointed under the regulations are not included in this table.

After that period gold was available for circulation.

[8] Total specie in circulation; gold and silver were not separately stated prior to 1876.

[9] According to census of 1890, 62,947,714, including population of Indian Territory and Indian reservations.

*Statistics of national banks are as of reports nearest to June 30 of each year. Those of other banks combine reports of various dates within the year.

[1] Postal savings deposits are not included.

[2] From 1896 to 1908, inclusive, includes Illinois State banks having savings departments. Returns from the banking departments of several States include stock savings banks with commercial banks. It was estimated for a recent year that 300 stock savings banks with 815,000 depositors and $250,000,000 deposits were included with the figures furnished by the State banking departments for State banks. This estimate included the so-called stock savings banks of Michigan.

[3] Includes all private banks from 1875 to 1882; from 1887 to date includes only those voluntarily reporting, estimated at one-fourth of total private banks.

[4] "Ordinary receipts" include receipts from customs, internal revenue, direct tax, public lands, and "Miscellaneous," but do not include receipts from loans, premiums, or Treasury notes, or revenues of Post Office Department. The figures cover actual receipts as of Treasury accounts.

[5] Actual collections on account of duties and tonnage tax.

[6] Individual and other.

[4] Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the exports in question are included. Gold and silver contained in ore are included under gold and silver since 1894.

[1] The statistics since 1913 represent the commerce of the districts named in the boxhead, as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914 the statistics given in this table for Massachusetts and Maryland were returned as for the (former) districts of Boston and Baltimore, respectively.

[1] Prior to 1875 the customs district of Texas.

[2] The statistics since 1913 represent the commerce of the districts named in the boxhead as rearranged July 1, 1913. The former limits in almost all cases were more restricted, and the statistics are accordingly not strictly comparable. Prior to 1914, the statistics given in this table for Buffalo and Michigan were returned as for the (former) districts of Buffalo Creek and Detroit, respectively.

*Calendar years.

† The production statistics (those for cotton being exclusive of linters) relate, when possible, to the year of growth, but, when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1858 to 1898.

[1] Cleaned rice; 1800 to 1903, commercial movement, as given by Dan Talmage's Sons Co.; 1904 to date, as reported by the Department of Agriculture.

[2] Commercial value. [3] Of 376 pounds net. [4] Gallons sold. [5] Exports.

* Fiscal years.

[1] After 1900 includes imports into continental United States and shipments thereto from noncontiguous customs districts.

[2] After 1900 the figures represent prices of all coffee received.

[3] Consumption per capita based on net coffee coming to and remaining in continental United States.

[4] Consumption per capita based on net imports.

[5] Data for years prior to 1890 are from Poor's Manual of Railroads and relate to calendar years; data from 1890 to date are from reports of the Interstate Commerce Commission and relate to fiscal years, except that after 1916 figures again represent calendar years. No mileage included for Alaska.

[6] Including tonnage received from connecting roads and other carriers after 1898. See table 237, p. 342, and corresponding tables in previous years.

[7] Exclusive of fast freight line service.

[8] Overvalued by reason of depreciation of Brazilian paper milreis.

[9] Information for 1901 and 1902 relative to commerce between continental United States and noncontiguous customs districts in coffee and tea is somewhat fragmentary.

[10] Includes an estimate for certain roads, as their records for this item were destroyed in the San Francisco fire of April, 1906.

[11] Figures for railroads exclude switching and terminal companies not segregated prior to 1908; also, 1913 to date, except for "miles in operation," the mileage of so-called small roads having operating revenues below $100,000 for the year.

[1] At Philadelphia after 1909, the figures relate to No. 2 foundry, the price thereof being usually 50 cents below that of No. 1. Figures for 1917 and 1918, however, represent Bessemer pig iron at Pittsburgh.

[2] At mills in Pennsylvania prior to 1918; "heavy" at mills.

[3] Net prices at New York.

[4] Postal cards first issued May 1, 1873, under act of June 8, 1872.

* School years.

[1] Figures for the years 1873–1882, inclusive, are for the calendar year preceding fiscal year.

[2] Figures until 1889 include nonresident graduate students; figures for 1889 and later years are exclusive of nonresident graduate students.

[3] Figures are not comparative. They relate to libraries of the following sizes: 1875 and 1885, 300 volumes and over; 1891, 1896, 1900, and 1903, 1,000 volumes and over; 1908 and 1913, 5,000 volumes and over. In 1908, 3,342 libraries with more than 999 and less than 5,000 volumes reported with 7,278,378 volumes, and in 1913 2,188 such libraries with 5,503,500 volumes.

[4] Figures from 1810 to 1860, inclusive, from census of 1880.

No. 454.—COMMERCIAL AND FINANCIAL STATISTICS OF THE PRINCIPAL COUNTRIES OF THE WORLD.

[Compiled from official reports of Governments. Foreign currencies have been converted at par. On account of fluctuations in rates of exchange and depreciation of currency of some countries, the commercial figures are considerably lacking in significance and comparability. These faults are so conspicuous in case of financial information included in this table in former issues of the Abstract that it has been deemed best to omit that feature from the present volume. For explanatory notes to this table see p. —.]

EXPLANATORY.

The figures for the German Customs Union, Hungary, Italy, Russia, and Turkey relate to prewar conditions. The data given for Austria, Czechoslovakia, and the Serb, Croat, Slovene State are official only in part, most of the figures being estimates. The dollar values of the foreign trade in many cases are too high, as the original data, expressed in terms of depreciated money, have been converted at par. The trade reports of Austria give quantities only. No reports have been received on the foreign trade of Poland.

Czechoslovakia.—Imports in 1919 were valued at 4,545,158,000 crowns; exports at 3,886,338,000 crowns. The trade with the United States was: Imports, 928,256,000 crowns; exports, 69,869,000 crowns. Owing to the fluctuations in the value of the crown no conversion has been attempted.

Rumania.—The foreign trade for 1919 was as follows: Imports, 393,179 metric tons, valued at 3,620,710,000 lei; exports, 108,508 metric tons, value 103,776,000 lei. The values have been converted at par. A comparison with the figures for 1915 shows that in 1919 the imports were about one-third larger in quantity while their value had increased nearly 11 times, and the exports decreased 92.3 per cent in quantity, but only 81.8 per cent in value.

Serb, Croat, Slovene State.—In 1919 the imports were 2,982,067,000 dinars, and the exports 672,060,000 dinars. It is stated, however, that the export figures are incomplete, as large quantities of goods exported in the first months of the year were not recorded.

The financial tables have been omitted for the reason that in many cases conversion at par would give a wrong idea of the amounts actually received or disbursed, or of the budget estimates.

France.—The nominal amount of the public debt on Sept. 30, 1920, was 285,836,001,459 francs, the annual charges being calculated at 11,912,999,621 francs. The foreign debt amounted to 83,272,605,000 francs, or about 29 per cent of the total debt. On the same date the amounts due to France from the Allies for advances and sales of material totaled 6,925,000,000 francs.

Germany.—The ordinary budget for the fiscal year ending Mar. 31, 1921, as submitted to the Reichstag on Oct. 22, 1920, balances at 39,891,562,733 marks. In the extraordinary budget the revenue is estimated at 2,287,769,024 marks and the expenditure at 52,579,319,139 marks, leaving a deficit of 50,291,550,115 marks to be covered by a loan. These figures do not include the postal budget nor the budget of the Government railways. On Sept. 30, 1020, the public debt of Germany was estimated at 247,709,000,000 marks, including 4,709,000,000 of prewar debt, 86,375,000,000 of war loans, and 156,625,000,000 of floating debt.

United Kingdom.—The revenue for the fiscal year ending Mar. 31, 1920, totaled £1,339,571,000 and the expenditure £1,665,773,000, so that 80.4 per cent of the expenditure was defrayed from the revenues and only 19.6 per cent from loans. On Mar. 31, 1920, the deadweight debt was estimated at £7,835,000,000, the foreign debt amounting to £1,278,000,000, or about 16 per cent of the total.
